DETAILED ACTION

Response to Arguments

Applicant's arguments filed 12/08/09 have been fully considered but they are not persuasive.

In response to applicant's argument that the valves of Dietiker are not "flow control valves", the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3, 8, and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Panissidi (2,878,015) in view of Dietiker (3,565,208).

Panissidi, in figure 1, teaches an arrangement for controlling a hydraulically driven motor 22, forming part of a hydraulic system in which hydraulic fluid under pressure forms a main flow through a main duct 21,25 in which the motor is connected,

the motor being adapted to drive a varying load, and one or more valves 40 being adapted for controlling the hydraulic fluid flow through the motor on the one hand during operation and on the other hand for starting and stopping of the motor, one of the valves consisting of a flow control valve (7) which is connected in the main duct (1) downstream of the outlet of the motor.

Panissidi doesn't teach the flow control valve is integrated with the motor housing.

Dietiker, in figures 1-7, teaches a motor, having a housing 10, and a flow control valve 86,88, the flow control valve is integrated with the motor housing. Since Panissidi and Dietiker are analogous art, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to integrate the flow control valve of Panissidi with the housing as taught by Dietiker for the purpose of compactness.

Allowable Subject Matter

Claims 4-8 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/549,728 Page 4

Art Unit: 3745

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Contact information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Igor Kershteyn whose telephone number is (571) 272-4817. The examiner can normally be reached on regular.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Look can be reached on (571)2724820. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
